

Mölnlycke BRACE Masterclass 2023:

Advance Wound care: Learn, Unlearn, Relearn

15 April 2023, Saturday
9:00AM SGT - 15:00PM SGT
One Farrer Hotel,
Grand Ballroom, Level 6

**2 CPE points will be awarded*

One in 20 Singaporeans has chronic wound conditions such as diabetic foot ulcers, pressure injuries, and arterial and venous ulcers. These numbers are set to increase further due to the increasing proportion of the elderly population and the diabetic epidemic.

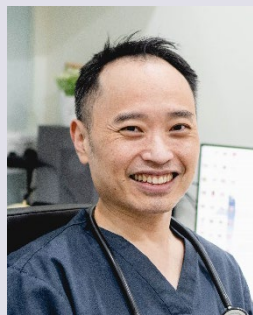

Considering etiologic factors, a chronic wound demands a multidisciplinary approach with great efforts of health care professionals to treat it **more efficiently, more simply and painlessly for the patient and more inexpensively** for health care funds.

In this BRACE Masterclass, let's learn, unlearn, and relearn the factors related to managing chronic wounds from the perspective of a general practitioner and wound care specialists in acute and step-down care facilities.

Key Highlights of the program:

- Learn about Chronic Wound Care Model: M.O.I.S.T
- Learn about the factors affecting the wound healing trajectory in a chronic wound
- Learn about the properties, structure and appropriate use of different types of wound dressing

MEET THE SPEAKERS

Dr Tan Kok Kuan
MBBS (Singapore)
Cert. Clinical Dermatology

Medical Director
Dr Tan Medical Center

Ms Goh Wee Ting
WOCN, Grad Dip. Curtin
University, UK
BSN, La Trobe University

Assistant Nurse Clinician
Singapore General Hospital

Ms Doris Hung
MSc Cardiff University, UK
CWON, USA

Nurse Clinician
National University Polyclinics
